Price: € 1250,- (ex. VAT)

Key Benefits

Ready for use for multiple planning activities:

- Last Planner® Methodology
- Agile / Scrum
- Visual Management
- Facilitates Communication
- Easy to transport

Introduction

Lean methods have been applied since 1991 in the construction area. Besides well-known methods to identify and erase waste the best-known method used is the Last Planner® System. This production-, planning- and controlling instrument unfolds its whole potential especially in fast and complex projects.

The collaborative knowledge of everyone involved in the construction process makes it possible to finish projects on average 20-30% faster, reduce waste and rework in favour of better quality.

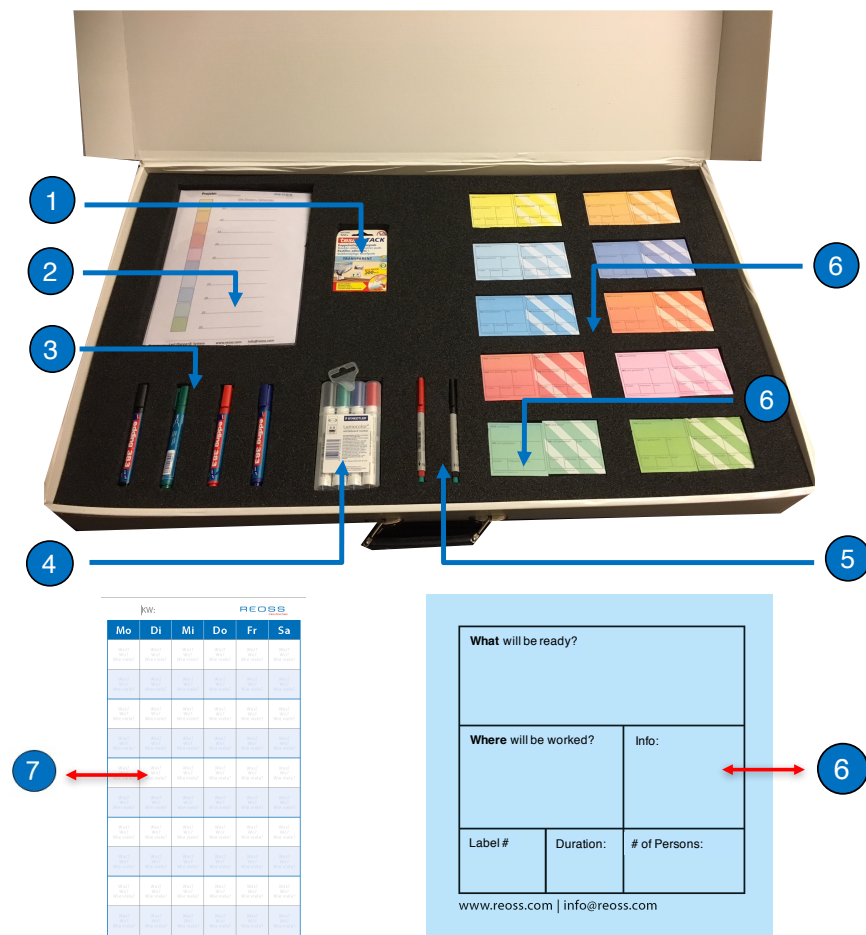

REOSS now offers a Lean Construction kit which can be used for Last Planner® activities, as well as agile and scrum planning. It can be used either in the office or at the construction site, to manage the rolling design and / or construction planning processes.

What makes this Kit Unique?

Our Lean Construction Kit is ready for use and has all the elements needed to start with Last Planner activities, as well as agile and scrum planning. It consists of 12 boards to be able to plan 6 weeks and has 20 different colours of post-it's so you can involve up to 20 different disciplines in your project.

Content Lean Construction Kit

1. Double sided tape (Powerstrips)
 2. Laminated List for disciplines (20 Fields)
 3. White Board Pencil (4 Colours)
 4. Permanent Markers (4 Colours)
 5. Slide markers red/black (To be used on Nr. 2)
 6. Sticky Note Blocks (20 Colours x 3 Blocks x 50 post-it's)
 7. Planning Boards (12 boards).
- (Size per board: 53 cm x 89 cm)
